

The VITLAccess V 7.4.3.2 Release

May, 2016 - A new version of VITLAccess—V 7.4.3.2—is about to be released, with several new enhancements and fixes. Most of the improvements are focused on infrastructure, with a few minor changes to the user interface. VITLAccess service users should realize a better overall performance experience. The screenshots below highlight changes to the user interface, and attached to this document is an updated VITLAccess Version 7.4.3.2 User Guide.

Overview

Currently Supported Operating System (OS) Recommended Browser Combinations

There are a limited number of OS/browser combinations recommended and supported for use with VITLAccess. For maximum performance, select one of the combinations listed below:

Windows 7 SP 1	Windows 8.1	Apple/Mac
Internet Explorer 11	Internet Explorer 11	Chrome
Chrome	Chrome	Safari
Firefox	Firefox	

New Sorting and Date Range Functionality

VITLAccess Version 7.4.3.2 includes new sort functionality that limits the display of content on the Patient Summary page. To improve load times on the Patient Results, Allergies and Patient Encounters pages, a new date range filter was added. Specifically, you can now limit the number of results returned based upon a specified date range: *Last 30 Days*, *Last 3 Months*, *Last 6 Months*, *Last Year*, and *All Records*. The default range is *Last Year*.
